E4 manuscript Results - Using ggplot

Marissa Lee

September 26, 2014

Filename: e4_ms_results.Rmd'

A. This code needs the following files:

1. *'e4Data' folder*

- 'e4_potData.txt'
- 'e4_potData_dictionary.txt'

2. *'e4Code' folder*

- 'e4_cleanCode.R'
- 'e4_calcsiCode.R'
- 'mytheme.R'
- 'statFxns.R'
- 'e4_Fig2stats.R' and 'e4_makeFig2.R' –> both reference –> 'e4_prepdfFig2.R'
- 'e4_Fig3stats.R' and 'e4_makeFig3.R' –> both reference –> 'e4_prepdfFig3n4.R'
- 'e4_Fig4stats.R' and 'e4_makeFig4.R' –> both reference –> 'e4_prepdfFig3n4.R'
- 'e4_Fig5stats.R' and 'e4_makeFig5.R' –> both reference –> 'e4_prepdfFig5.R'

B. This code does the following things:

1. Clean raw dataset (run external code)
2. *'e4Output_figures' folder* has Results section figures
    - Fig2. Species' biomass
    - Fig3. Soil measures vs Pot monoculture type
    - Fig4. Soil measures vs M.v. biomass w/o neighbors
    - Fig5. Soil measures vs M.v. biomass w/ neighbors, vs relative Mv abundance, vs total biomass
3. *'e4Output_tables' folder'* has txt tables that hold anova results and mean values

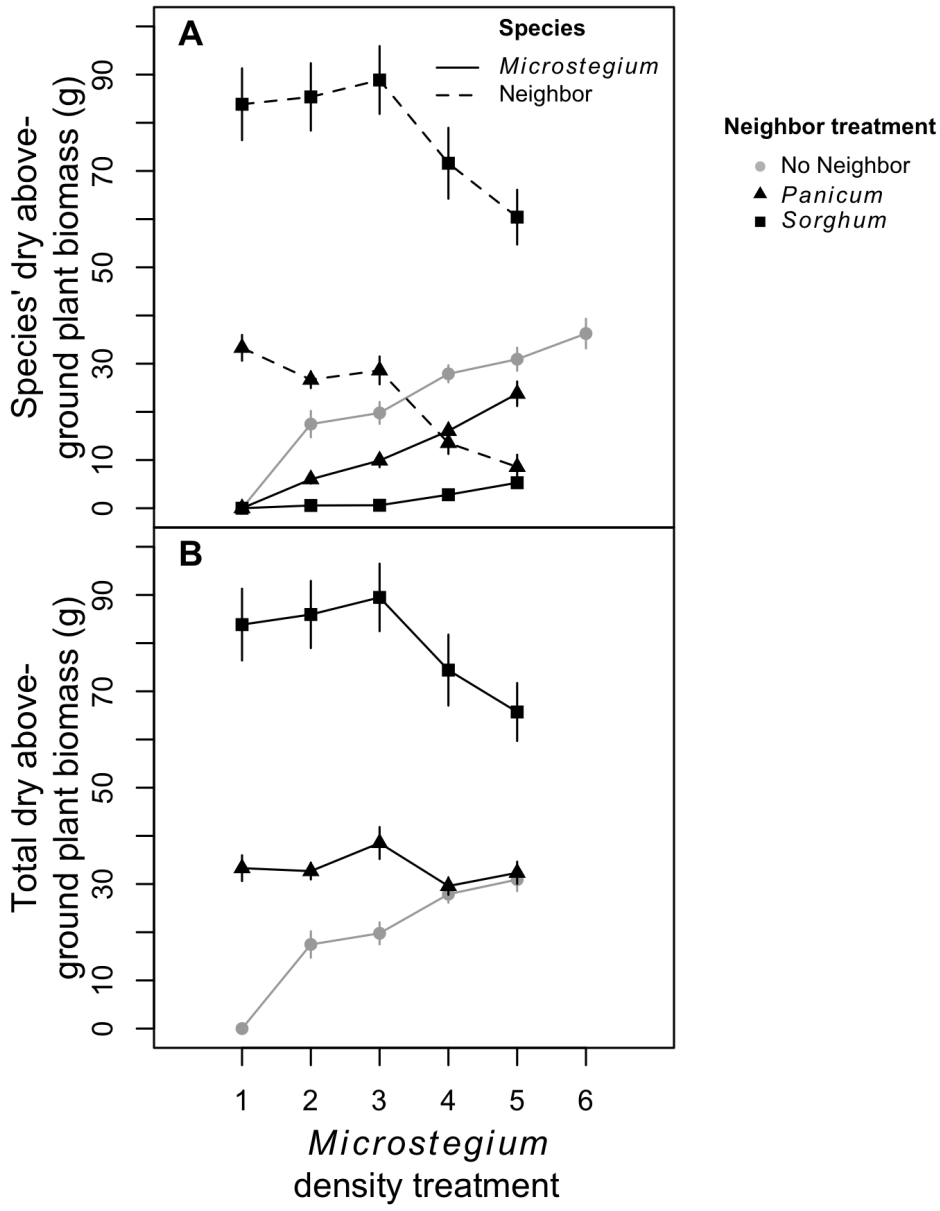
---

1. Clean raw dataset (run external code)

---

2. Plot

Fig2 : Plant biomasses vs density trt



e4Output_tables/fig2_means.txt – **Figure 2 Means**

e4Output_tables/fig2_lme_anova.txt – **Microstegium biomass, relative abundance, and total plant biomass were shaped by the density treatment, neighbor treatment, and their interaction**

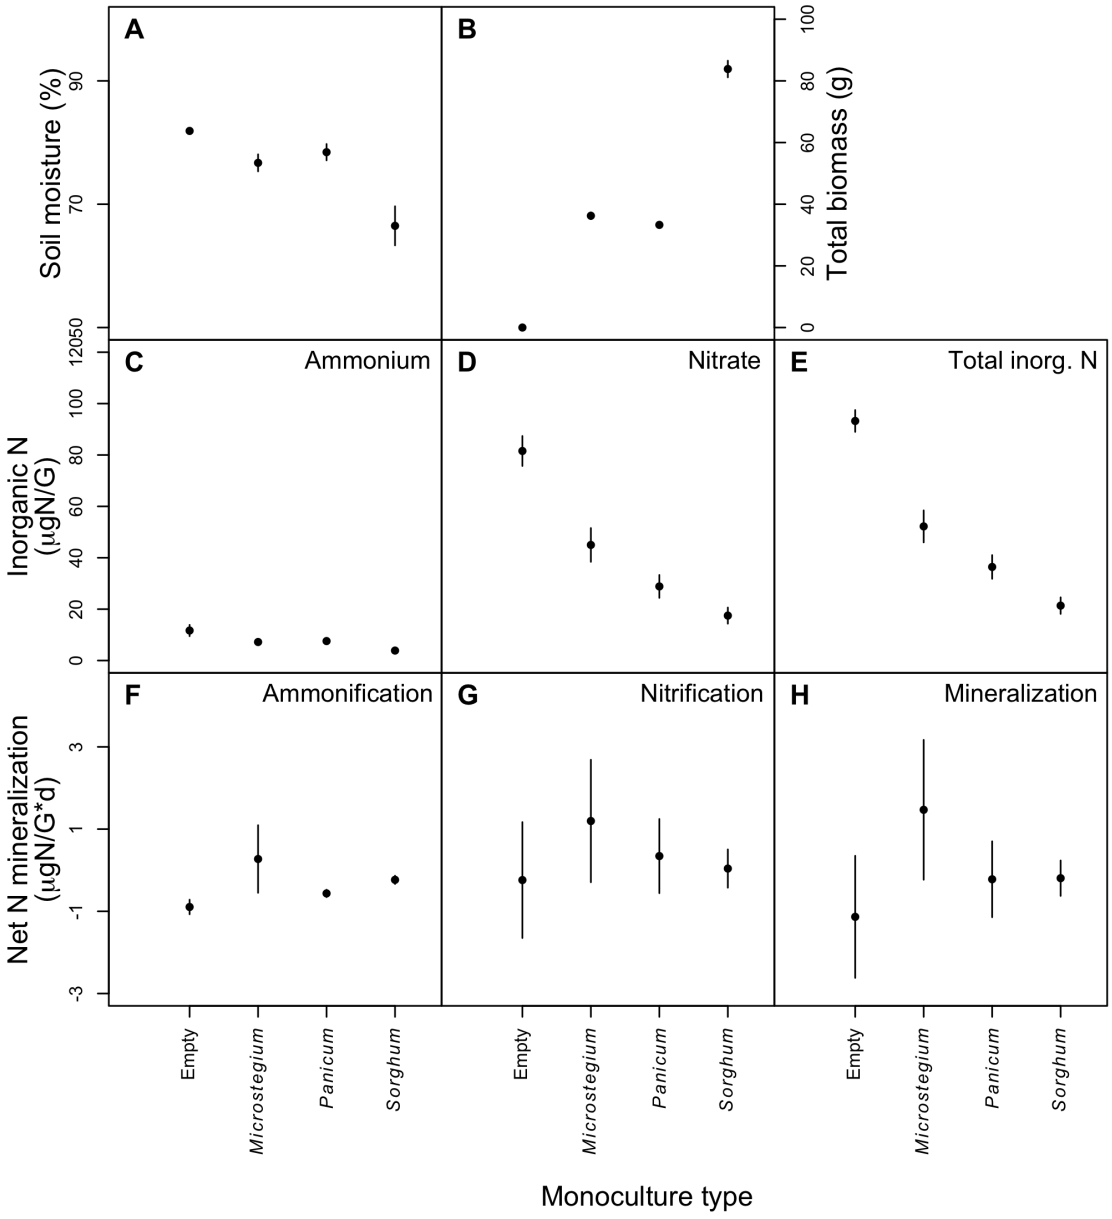
Microstegium biomass and relative abundance were X to X times lower in the presence of Sorghum than Panicum across density treatments (Fig 2)

```
##   INNERID XgreaterthanNP XgreaterthanPS
## 1       1       2.905826      10.505245
## 2       2       1.997375      16.128664
## 3       4       1.738686       5.727240
## 4       5       1.301545       4.490833
```

Pots with Sorghum also had X to X times more total plant biomass than those given the Panicum neighbor treatment and X to X times more total plant biomass than the no neighbor treatment (Fig 2)

```
##   INNERID XgreaterthanPN XgreaterthanSP
## 1       1       1.871588       2.629804
## 2       2       1.946967       2.323700
## 3       4       1.060591       2.515111
## 4       5       1.045528       2.032164
```

Fig3 : Monocultures vs total biomass and soil measurements



e4Output_tables/fig3a_means.txt – **Figure 3a Means**

e4Output_tables/fig3b_means.txt – **Figure 3b Means**

e4Output_tables/fig3_lme_anova.txt – **Soil measures and total biomass were shaped by the plant type**

Fig4 : Mivi biomass vs soil measures w/o neighbors
